

OLC # 78-5420

United States Senate

October 11, 1978

Respectfully referred to:

Office of Legislative Counsel
Central Intelligence Agency
Washington, D. C. 20505

Please address return to the
attention of Jon Thompson.
Thank you!

Because of the desire of this office to be
responsive to all inquiries and communications,
your consideration of the attached is
requested. Your findings and views, in
duplicate form, along with return of the
enclosure, will be appreciated by

U.S.S.

Form #2

STAT

September 13, 1978

Senator Harrison Schmitt
1251 Dirksen Office Building
Washington, D. C. 20510

Dear Senator Schmitt

One of my school projects this semester will be the discussion on five controversial subjects which effect the production of energy in the United States. The subjects are: Fast Breeder Reactors, The Power Tower Concept, Endangered Species, Coal Economy, and Conservation (Industrial/Individual).

The one subject that interests me at the moment is Endangered Species, since the Senate recently voted 93 to 3 to add 2,000 new species to the endangered list. How did you vote on this matter, and why?

Another problem facing us, is the steadily growing increase in the percentage of CO₂ in the atmosphere. The C.I.A. has conducted the most extensive studies to date on this matter. Why such an unlikely agency conduct such a study?

Any information you may be able to supply me with on any or all subjects will be greatly appreciated, and also your own personal feelings on each subject, and why.

Yours truly

M. Priscilla Garcia
